

AQUA ZERO FLOOR PAD

Grinding wet? AQUA ZERO pads from WORX+ have been designed to deliver more meters in the wet. Long life resin pads, rubber and Velcro backed to increase flexibility and smooth operation, with a highly consistent scratch pattern, are the choice for floor honing and polishing and wet cutting power-trowelled/burnished concrete where zero aggregate exposure is required before densification.

FEATURES & BENEFITS:

- Long life compared to conventional resin pads when used wet on Concrete surfaces.
- Rubber backed for additional flexibility and smoothness of operation.
- Non-aggressive, highly consistent scratch pattern which provides an excellent platform for subsequent densification and polishing steps.

APPLICATION:

- Floor honing & polishing.
- Wet cutting power-trowelled/burnished concrete where zero aggregate exposure required before densification.

SPECIFICATIONS:

- 75mm (3") Velcro & rubber backed.
- 10mm thick abrasive layer.
- Most suitable for wet use.
- Available in grits 50,100,200 & 400.
